

A FUNCTION is a relation in which each first value is paired with one and ONLY ONE second value.

### Relation (a set of ordered pairs)

- x y
- ( , )
  - ( , )
  - ( , )
  - ( , )
  - ( , )

Decide whether the relation is a function. Yes or No

Why or why not?

---

---

---

### Input-Output Tables

x	y

x					
y					

Decide whether the relation is a function. Yes or No

Why or why not?

---

---

---

### Mapping

Decide whether the relation is a function. Yes or No

Why or why not?

---

---

---

MCC8.F.1 Understand that a function is a rule that assigns to each input exactly one output. The graph of a function is the set of ordered pairs consisting of an input and the corresponding output.

### Vertical Line Test for Functions: a VERTICAL line crosses only one point on the graph

Decide whether the relation is a function. Yes or No

Why or why not?
